Key-Pad[®]

NEW

How do you clean your desktop or laptop?

Vox pops prove that:

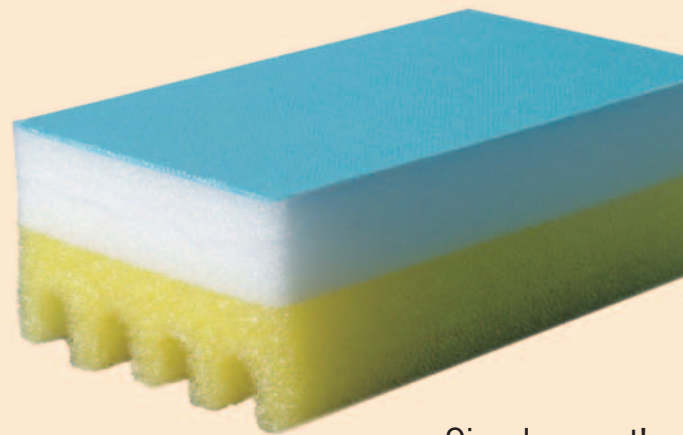

- Cleaning time-consumption hinders a frequent tidiness of the desktops in the office.
- Dirt is accepted enforcedly.
- Notebook users would like to have a portable and nifty cleaning kit.

Would you like to work on a clean laptop?

We have the solution for you:

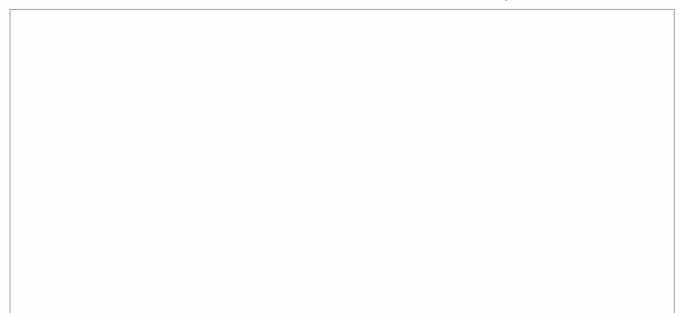

- fast • uncomplicated • practical!

Multiple-use special cleaning sponges for keyboard and monitor prepared as a cleaning kit for the desktop and for travelling.

Simply great!
Our products are also available online.
Order directly – that's it!

Your partner for cleanliness.

Why *Key-Pad*® and *Lap-Clean*® ?

Scientifically proven tests show that keyboards contain 400 times more bacteria than toilet seats.

By 2007, there will be more than 1 billion computers in use worldwide.

Dirt due to body fats, food remainings, skin particles, dust and much more, have a natural effect: transmission of bacteria and germs.

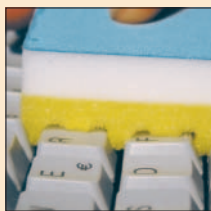

Nowadays many companies ask for their devices to be cleaned, once or twice yearly, by professional IT services.

But what can be done in between?

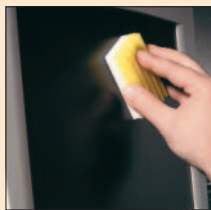

Our product is the solution. Since not much space is required, single sets can be stored at the desktop or in any bag.

The stability layer of the sponge gives you a good grip. This saves time and effort.

Cleaner devices improve the efficiency of work.

- Gaps for the cleaning of keys and for the hardly reachable in-between sections.

- Blue micro-fibre cloth for smooth cleaning of monitors and sensitive TFT monitors.

- Compact box, easily storable at any desktop or in any notebook bag.

- After usage, the sponge can be rinsed with clear water, dried and used again.

The cleaning liquid can be ordered separately at any time.

All our products can be ordered directly from the Internet shop.
